CAREER OBJECTIVE

Results-driven and detail-oriented Data Science graduate with a strong foundation in Python, Machine Learning, SQL, and Generative AI. Design a data visualization and dashboard using Matplotlib, Seaborn and Power BI tools. Passionate about building real-world AI applications using modern tools such as Streamlit, LangChain, and Large Language Models. Eager to contribute my analytical thinking, a proactive learning mindset, and hands-on technical expertise to innovative projects in AI/ML and Data Science.

EDUCATION

Bachelor of Science (B.Sc.) in Data Science – Percentage: 85%
RVS College of Arts and Science, Sulur 2023 - 2026

Higher Secondary Certificate (HSC) – Percentage: 87%
Govt. Boys. High. Sec. School, Sulur 2022 - 2023

SKILLS

Technical skills :

- **Core skills:** Python, Machine Learning, SQL, Data Analysis, Generative AI and Prompt Engineering.
- **Tools & Technologies:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, MySQL, Scikit-learn, LangChain, Large Language Models (LLMs), Streamlit, VS Code, Jupyter Notebook and GitHub.

Soft skills :

- Quick learner with a strong willingness to learn new technologies.
- Good problem-solving and logical thinking ability.
- Ability to work well in a team.

PROJECTS

SreeAI PDF Chatbot – RAG assistant – [Project link](#)

Technologies: Python | Streamlit | LangChain | HuggingFace | FAISS | Groq & API

- Built a conversational AI PDF chatbot capable of answering questions from uploaded PDF using RAG architecture.
- Utilized LangChain, FAISS, and HuggingFace embeddings for semantic search and context retrieval from PDF.
- Implemented conversational memory and real-time streaming responses for interactive AI conversations.
- Integrated Groq LLM and secure API key management using Streamlit Secrets for cloud deployment.
- Live Demo link: <https://sreeai-pdf-chatbot.streamlit.app>

SreeAI chatbot – Mini AI assistant – [Project link](#)

Technologies: Python | Langchain | Groq API | Llama 3.3 | Streamlit

- Developed a conversational AI chatbot using Python, Streamlit, LangChain, and Groq LLM.
- Implemented real-time streaming responses with conversational memory for interactive AI conversations.
- Built a clean and responsive chatbot interface with session state management and chat history handling.
- Integrated secure API key management using Streamlit Secrets for deployment and production-ready usage.
- Live Demo link: <https://sreeai.streamlit.app>

Customer Churn Prediction using Machine Learning - [Project link](#)

Technologies: Python | Pandas | NumPy | Matplotlib | Seaborn | Scikit-learn | Power BI

- Created a ML model to predict customer churn using classification algorithms and preprocessing techniques.
- Conducted exploratory data analysis, feature encoding, and missing value handling using Pandas and NumPy.
- Created an interactive Power BI dashboard to visualize churn insights and support business decision-making.
- Achieved 81.55% accuracy using evaluation metrics such as Precision, Recall, F1-score, and Confusion Matrix.

CERTIFICATIONS

Python Certification Course – CodeFobe App

24-12-2024 to 25-01-2025

- Completed a project-based Python certification course with coding exercises and hands-on assessments.
- Strengthened foundational knowledge in Python programming, logical thinking, and problem-solving concepts.

ACHIEVEMENTS

- Ranked top 1st in Class 12th and secured top 3rd rank overall in the school for academic performance.
